

Concepts Discretionary Investments

Progressive Income Portfolio

Portfolio Factsheet as at 30th April 2024

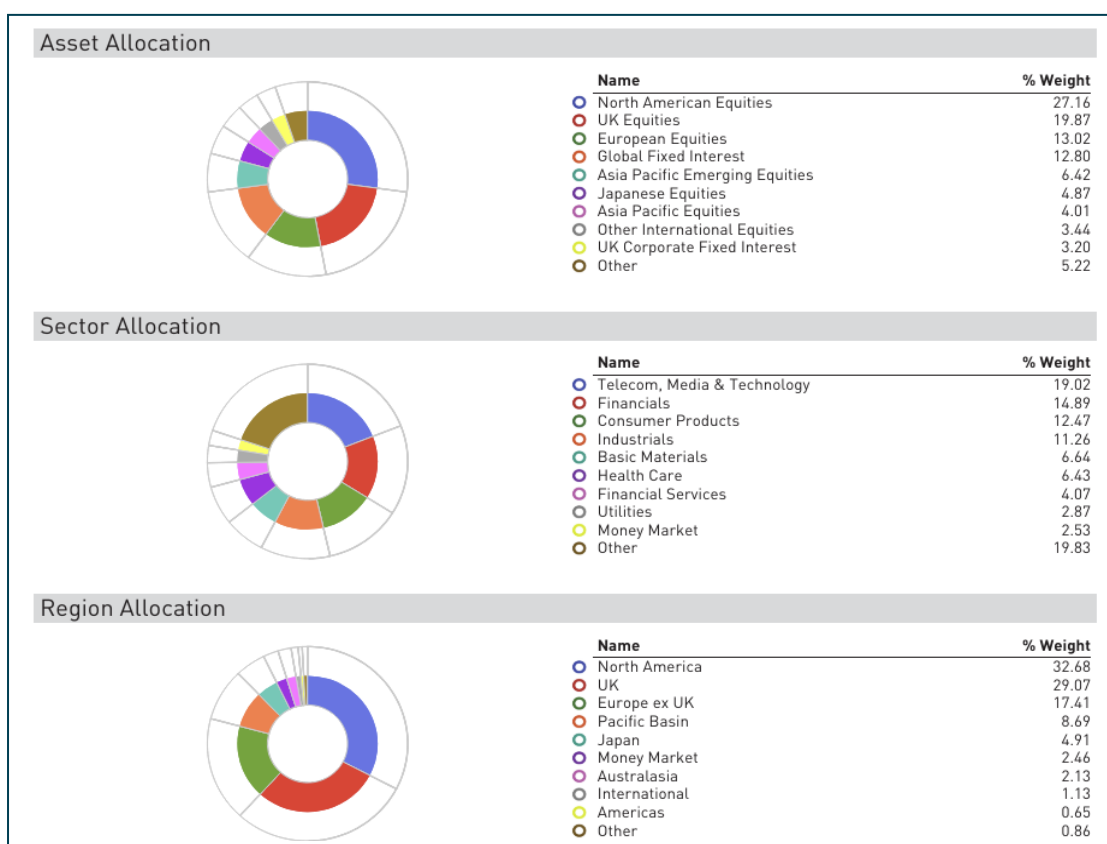

Objective: The CDI Progressive Income portfolio invests in a blend of Equities (both UK and Global) which account for around 65% to 70% of the portfolio by weight, with the fund selection aiming to generate an attractive level of natural income together with capital growth. The balance is held in Government and Corporate Fixed Interest Securities (again both UK and Overseas) and other assets, such as infrastructure, to add further diversification.

Target Market: This portfolio is suitable for investors with a time horizon of 5 years or more who are willing to accept Medium to Medium/High levels of investment risk in return for the potential for participation in rising investment markets. This fund is designed for investors who can afford more than a modest loss of their investment.

Key Information

Portfolio Yield: 3.06%
Inception Date: 09/10/2018
Total Expense Ratio: 0.50%
Management Charge: 0.20%
Benchmark: IA Mixed Investment
 40% to 85%

Portfolio performance represents client's portfolios which are periodically rebalanced. Performance has been simulated with performance prior to 09/10/2018 attained through backdating holdings at launch to the inception of these individual investments, and substituting where appropriate for indexes, to attain a longer performance history.

The value of underlying investments may fluctuate due to exchange rate changes between Sterling and the currencies in which underlying investments are denominated, as well as to risks associated with broader market conditions and events.

In addition to the charges noted above, individual funds may incur transactional costs.
